Summary

Enthusiastic Full-Stack Web Developer with expertise in front-end technologies like HTML, CSS, Bootstrap, and JavaScript and React , back-end development with Java and Spring Boot, and database management using SQL. Proven ability to develop responsive, user-friendly websites and applications through academic projects and internships. Adept at solving complex problems and eager to collaborate with a dynamic team to develop innovative web solutions.

Projects

GAMESTOP APPLICATION

- Technologies - Spring Boot , Java , MySql , Restful API , Postman .
- Designed and implemented RESTful APIs using Spring Boot to handle CRUD operations for products, customers, and orders.
- Used Postman for API testing, ensuring proper request/response flow .

PURELYMADE - FULL STACK E-COMMERCE WEBSITE

- Tech Stack: Java, Spring Boot, React.js, HTML, CSS, JavaScript, MySQL
- Developed "PurelyMade," a full-stack e-commerce platform for handmade products using Java, Spring Boot, React.js, MySQL, and JavaScript with role-based access for Admin and User, product CRUD, and cart functionality tied to user email.
- Built secure authentication, admin dashboard, and dynamic user interface, enabling product management, order tracking, and responsive shopping experience with persistent data storage and custom localStorage-based cart.

EVENT MANAGEMENT WEBSITE

- Technologies : HTML , CSS , JavaScript .
- Developed "The House of Event", an event management website using HTML, CSS, and JavaScript, featuring event booking, a contact form, and a terms & conditions section for seamless client interaction.
- Implemented dynamic features, including image and video galleries, and a blog section where clients can post their own blogs, enhancing engagement and user experience.
